Galvanized steel pallet with 7 boards h1037_04

Galvanized steel pallet 1200x800 mm, 19.7 kg. 7-board structure with rivet technology, fireproof and ideal for international logistics and export.

The **h1037_04 galvanized steel pallet** is an advanced solution for industrial logistics, designed to optimize warehouse management through a combination of **structural stability** and low weight. This support solves operational criticalities related to cyclic maintenance and fire risks in intensive warehouses. The use of a **patented profiling technology** allows for high-resistance profiles with reduced thicknesses, guaranteeing a self-weight of only 19.7 kg which facilitates manual handling and reduces the impact on transport costs.

Technical features

- **Material:** hot-dip galvanized steel with high corrosion resistance
- **Dimensions:** 1200 x 800 mm
- **Configuration:** top deck with 7 boards for uniform load distribution
- **Self-weight:** 19.7 kg
- **Assembly technology:** mechanical fastening via high-strength rivets (no welding points)
- **Structure:** special thin-walled profiles without the use of solid material
- **Physical properties:** 100% fireproof and stable to extreme thermal variations
- **Hygiene:** non-porous surface, easy to wash and resistant to moisture
- **Sustainability:** fully recyclable structure at the end of its operational cycle
- **Export:** exempt from fumigation obligations and ISPM 15 treatments for international shipments
