

Galvanized steel parking barrier h972_67

Folding galvanized steel barrier, 75.5×38×39.5 cm, for the secure reservation of parking spaces. Equipped with reflective strips, 8 reflectors and a brass padlock.

The **H972_67 parking barrier** is a folding bollard designed to **securely and practically reserve a parking space** in residential, corporate or public contexts. Made of **galvanized steel**, it offers **long-lasting protection against rust, impacts and bad weather**, and is equipped with **rounded bases** to ensure safety and prevent accidental damage to vehicles or pedestrians.

Thanks to the **two Class 1 red reflective strips** and the **8 integrated reflectors**, the barrier is **highly visible even at night or in low light conditions**. The locking mechanism is simple and secure: the product is supplied with **a brass padlock and a set of 3 different keys**, to manage access exclusively.

To ensure a stable and durable installation, in the case of stone or pavé flooring, it is recommended to **pour a 250 × 250 × 250 mm concrete foundation** and let it dry for 21 days before fixing.

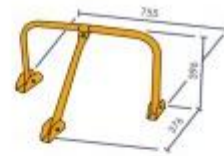

Technical features

- **Main material:** galvanized steel
- **Main color:** gray
- **Type:** folding barrier
- **Dimensions:** 75.5 × 38 × 39.5 cm (length × width × height)
- **Tube diameter:** Ø 40 mm
