

## Gas cylinder storage container h883\_51

Gas cylinder storage container in galvanized carbon steel. W. 95 x D. 90 x h. 120 cm. Capacity: 4 cylinders.

**Cylinder storage units** represent a solution designed to store compressed gases in total safety, preventing impacts or falls that could cause the dangerous leakage of the content. This model, in particular, features a **structure** made of **20/10 carbon steel, hot-dip galvanized**. Designed **for the storage of 4 cylinders** (not included in the supply), it has a **movable structure** via forklift. Product **entirely made in Italy**. Supplied **assembled and ready for use**. **CE compliant**.

### Technical features:

- Dimensions: W. 95 x D. 90 x h. 120 cm
- Storage: 4 cylinders (not included in the supply)
- Construction material: 20/10 carbon steel
- Subjected to hot-dip galvanizing process
- Movable structure
- Loading and unloading ramp not included in the supply
- CE compliant
- 100% Made in Italy

*\*Image purely indicative. The loading/unloading ramp is not included in the supply.*
