

Giraffe spring rider for children h27101

Giraffe-shaped spring rider made of HDPE and galvanized steel, 25x86x80 cm. High UV resistance, ideal for public parks and school areas.

The **h27101** spring rider is a play solution designed for installation in public spaces, playgrounds, and school courtyards. The structure combines a giraffe-shaped figurative silhouette in **high-density polyethylene (HDPE)** with a mechanical steel base, offering a safe and stimulating individual play experience for children's motor development. The choice of materials ensures high resistance to thermal cycles and the degrading action of solar rays, maintaining structural and chromatic integrity over time.

Technical characteristics

- **Materials:** Galvanized and painted steel for the structure; high-density polyethylene for the silhouette.
- **Configuration:** Individual use giraffe-shaped rider.
- **Total dimensions:** W. 25 x D. 86 x h. 80 cm.
- **Safety area:** 2 x 3 meters.
- **Fall area:** 5.8 sqm.
- **Maximum fall height:** 0.5 meters.
- **Installation:** Designed for ground anchoring via specific metal frames.
- **Production:** Made in Italy.

Professional installation service is available upon request and subject to a quote.
