

Goods transport trolley h887_21

Manual folding trolley in stainless steel and polypropylene, load capacity 150 kg, dimensions 73x48x82.5 cm, equipped with space-saving telescopic wheels.

The **professional trolley for goods handling** is a technical solution designed to combine operational robustness with maximum portability. Made with a hybrid structure in **stainless steel** and polypropylene, the device effectively responds to the needs of internal logistics, offices, and light industrial contexts where corrosion resistance is a fundamental requirement. The integrated closing system and **telescopic wheels** allow for a drastic reduction in the trolley's footprint when not in use, facilitating storage in narrow warehouses or inside commercial vehicles.

Technical features

- **Materials:** Stainless steel and high-resistance polypropylene
- **Maximum load capacity:** 150 Kg
- **Total dimensions:** W. 73 x D. 48 x H. 82.5 cm
- **Operating weight:** approx. 8.51 Kg
- **Sliding system:** 2 integrated telescopic wheels
- **Configuration:** Fully foldable structure
- **Maneuverability:** Lightweight frame for intensive use
