

## Goods transport trolley with 2 steel sides h286\_48

Steel platform trolley with two side panels, Ø 200 mm rubber wheels and tubular handles. Ideal for heavy load handling.

This **professional parcel trolley** is designed to meet the intensive handling needs within warehouses, logistics centers, catering activities, and portage sectors. The structure is entirely made of high-strength **sheet steel**, with a loading platform integrated with reinforcement tubes to ensure structural stability even under stress.

The configuration with **two side panels** on the short sides allows for secure containment of goods, preventing load slippage during acceleration and braking phases. The handling system relies on **four solid rubber wheels** of large diameter, mounted on galvanized sheet supports, which ensure smooth sliding on various types of industrial flooring.

## Technical features

- **Total dimensions:** L 1000 x D 600 x H 270/790 mm
- **Loading platform:** Single sheet steel platform with reinforcement tubes
- **Sides:** 2 fixed side panels positioned on the short sides
- **Handle:** Metal handles in Ø 28 mm round tubular
- **Wheel system:** 2 fixed wheels and 2 swiveling wheels
- **Wheel material:** Rubber with 200 mm diameter
- **Wheel supports:** In corrosion-resistant galvanized sheet metal
- **Finish:** Powder coating with oven baking for maximum durability
- **Color:** Blue RAL 5010
