

Gray workbench h965_14

Gray steel workbench (150x73x83 cm) with liquid-resistant metal top, 635 kg load capacity and integrated telescopic drawer. The **professional workbench h965_14** is a structural solution designed for industrial environments, mechanical workshops and technical laboratories that require heavy-duty support. The configuration with a **metal top** meets the needs of operating departments where contact with oils, solvents, moisture or corrosive substances is frequent, guaranteeing a non-deformable and easy-to-sanitize support surface. Stability is ensured by a self-supporting steel structure that does not require wall anchoring, facilitating the reconfiguration of production layouts.

Technical features

- **Dimensions:** W 150 x D 73 x H 83 cm
- **Load capacity per shelf:** 600 kg
- **Total maximum load capacity:** 635 kg per module
- **Work surface:** Metal with high resistance to liquids and corrosion
- **Structure:** Steel with scratch-resistant epoxy-polyester powder coating
- **Storage:** 1 drawer with smooth-running telescopic slides
- **Assembly system:** Assembly with screws (estimated time 15 minutes)
- **Stability:** Self-stable structure with 4 protective plastic feet
- **Color:** Industrial gray
