

Grid-marked postural analysis mirror 100x170 cm h581_53

Grid-marked postural mirror for physiotherapy and rehabilitation centers. Thickness: 4 mm. Dimensions: 100 x h. 170 cm.

Inside physiotherapy clinics and rehabilitation gyms, **postural analysis mirrors** are essential, representing the ideal solution to help patients correct their posture and resolve problems with joints or spinal muscles. This model features a **grid-marked surface**, designed to show the image of the patient's entire body. **Wall-mounted or on a trolley (trolley not included)**, it has a structure composed of a **100 x h. 170 cm glass sheet**, equipped with a **certified safety film** thanks to which, in case of mirror breakage, the glass fragments will remain anchored to the film itself. The mirror with film is glued to a **polystyrene panel finished with a white MDF panel**. Everything is supported by a **solid aluminum frame**. The mirror has a **thickness of 4 mm**.

Technical features:

- Dimensions: 100 x h. 170 cm
- Thickness: 4 mm
- Weight: approx. 30 kg
- Type: grid-marked
- Rectangle dimensions: 10 x 5 cm
- Equipped with adhesive mesh safety film
- Mirror material: glass
- Structure with polystyrene panel finished with a white MDF panel + aluminum profile
- Wall-mounted or on a trolley (not included)
