

Ground-mounted pedestrian bollard h337_30

Powder-coated steel pedestrian bollard Ø 80 mm with sphere, height 120 cm, ground-mounted installation for the safe delimitation of urban areas.

The **pedestrian bollard** is a structural deterrent designed for the protection of pedestrian zones and the delimitation of limited traffic areas. Made of **powder-coated steel** in anthracite grey, the device ensures high mechanical resistance and long durability in outdoor environments. The aesthetics are finished with a decorative sphere on the top, while the **integrated flange** allows for the connection of chains to create continuous barriers (chain not included).

Technical features

- **Material:** powder-coated steel
- **Top finish:** with decorative sphere
- **Tube diameter:** 80 mm
- **Total dimensions:** 8 x 8 x h 120 cm
- **Color:** anthracite grey
- **Installation:** to be embedded in concrete
- **Accessories:** integrated chain flange (chain excluded)
