

Gynaecological examination chair h602_08

Gynaecological chair in steel and fire-retardant sky with 4 electric actuators, Trendelenburg system and 230 kg capacity for specialist clinics.

The **gynaecological examination chair** is a high-performance outpatient solution, designed to combine clinical ergonomics with a modern and functional design. The **painted steel** supporting structure guarantees stability and longevity, while the low-voltage movement system based on **4 electric actuators** allows for smooth and precise management of the patient's posture. The device is upholstered in high-resistance **fire-retardant sky**, a material chosen for ease of sanitization and durability in high-frequency use contexts. The configuration includes electric movement of the legrest and the Trendelenburg function, making it suitable for various diagnostic procedures and minor surgeries.

Technical features

- **Structure:** high-resistance painted steel
- **Upholstery:** certified fire-retardant sky
- **Movement system:** 4 independent electric actuators
- **Motorized functions:** lifting, backrest tilt (up to 180°), legrest adjustment and Trendelenburg
- **Accessibility:** minimum seat height of 51 cm to facilitate access
- **Height range:** from 51 cm to 91 cm
- **Maximum capacity:** 230 kg
- **Mobility:** integrated 4-wheel kit with pedal brake system
- **Classification:** Class I medical device

Optional accessories:

- Height-adjustable headrest
- Articulated and adjustable leg supports
