

## Gynecological and urological examination chair h602\_13

Gynecological and urological chair in antimicrobial steel with 4 electric actuators and Trendelenburg position. Compact design ideal for limited spaces.

The **gynecological and urological examination chair** is a professional device designed to offer maximum precision and comfort in an outpatient setting. Thanks to a movement system based on **4 low-voltage electric actuators**, the operator can independently adjust the height, backrest inclination, leg section, and Trendelenburg position. The structure is made of **painted steel with antimicrobial properties**, guaranteeing high hygiene standards and structural resistance suitable for intensive use.

### Technical features

- **Frame material:** Painted steel with antimicrobial treatment
- **Movement:** 4 electric motors for lifting, Trendelenburg, backrest, and leg section
- **Safety:** Low-voltage control system
- **Maximum weight capacity:** 180 kg
- **Customization:** Upholstery available in various colors
- **Dimensions:** Specifically designed for environments with limited space

#### Available options:

- Height-adjustable headrest
- Painted steel base equipped with wheels
- Professional leg supports
- Possibility of configuration with fixed base (on request)
