

## Gynecological chair h602\_10

Electric gynecological chair in antimicrobial steel with single actuator lifting. Compact design for small spaces, 180 kg load capacity.

This **gynecological chair** is designed to optimize operation in medical practices and specialist clinics where space is limited. Thanks to the compact and modern design, the device integrates perfectly into outpatient contexts while ensuring robustness and functionality. The movement system is entrusted to a **low-voltage electric lift** with a single actuator, which allows smooth height adjustment to facilitate both patient access and the doctor's activity.

The structure is made of **painted steel** treated with antimicrobial properties, a fundamental feature for maintaining high hygienic standards in the healthcare field. Stability is guaranteed by a maximum load capacity of 180 kg, making the chair suitable for a wide range of users.

## Technical features

- **Frame material:** painted steel with antimicrobial treatment
- **Lifting system:** low-voltage electric (1 actuator)
- **Load capacity:** 180 kg
- **Aesthetics:** finishes available in different color variants
- **Dimensions:** space-saving configuration for compact environments

### Available options:

- Height-adjustable headrest
- Painted steel base equipped with wheels
- Professional leg supports
- Fixed base (available on request upon quotation)
