

Gynecological chair h602_12

Gynecological and urological chair in antimicrobial steel with 3 actuators, compact for limited spaces, ideal for examinations and outpatient procedures.

This **specialist chair** is designed for gynecological and urological use, offering a versatile solution for medical practices and clinics where space optimization is essential. Movement is managed by **3 low-voltage electric actuators**, allowing precise adjustment of lifting, Trendelenburg tilt, and backrest, ensuring maximum operational comfort and correct patient posture during the examination.

The frame is made of **powder-coated steel** with specific antimicrobial properties, an essential feature for maintaining high hygiene standards in clinical environments. The solid construction allows a maximum capacity of 180 kg, ensuring stability and safety in every configuration of use.

Technical features

- **Frame material:** Steel with antimicrobial coating
- **Movement system:** 3 independent electric motors (height, Trendelenburg, backrest)
- **Power supply:** Low voltage for maximum electrical safety
- **Load capacity:** 180 kg
- **Customization:** Upholstery available in various color options

Available options:

- Height-adjustable headrest
- Mobile base on wheels in coated steel
- Professional leg supports
- Fixed base (configuration on specific request)
