

Gynecological chair with adjustable seat h930_79

Gynecological chair with electric height adjustment and gas-spring seat with Trendelenburg. Dimensions: L 188 x W 65 x H from 70 to 105 cm.

The **gynecological chair with adjustable seat H930_79** is designed for professional use in **clinics, health centers, and medical offices**, where a stable station, practical adjustments, and patient comfort during examinations and procedures are required. The chair features a modern structure with a **steel frame and powder coating in white**, a combination designed to ensure solidity and a tidy, professional appearance. The **faux leather upholstery**, available in various colors, allows the seat to be adapted to the aesthetics of the clinical environment while maintaining a comfortable surface.

The functional core of the H930_79 is the **adjustable seat with gas springs**, which allows positioning in **Trendelenburg and anti-Trendelenburg** to best manage patient posture. To support daily operations, you also find an **adjustable backrest with gas springs** (inclination **0°–75°**) and **electrically adjustable height**, useful for adapting the station to the needs of the physician and patient management. Standard equipment includes **leg rests (set) adjustable on all planes, detachable footrest, stainless steel basin, backrest cover**, and **4 adjustable rubber feet** for leveling the chair. Dimensions reach **188 cm** in length with leg support (**138 cm** without support), with a **width of 65 cm** and an **allowable load of 150 kg**.

Note on heights: the chair can be configured with **4 adjustable feet (70–105 cm)**.

Choose a chair with an adjustable seat and electric height to improve examination management. Purchase the **H930_79 chair** now or request a quote for multiple supplies.

- **Station:** more complete during the examination with stainless steel basin and dedicated accessories.
- **Stability:** and correct setup with 4 adjustable rubber feet for leveling.

FAQ:

1. **Does the seat support Trendelenburg and anti-Trendelenburg?**
Yes, the seat is adjustable with gas springs and allows Trendelenburg (0°–25°) and anti-Trendelenburg (0°–15°).
2. **How is the chair height adjusted?**
The height is electrically adjusted.
3. **What is the adjustable height of the feet?**
With 4 adjustable feet, the height is 70–105 cm.
4. **What accessories are included in the standard equipment?**
Detachable footrest, adjustable leg rests, stainless steel basin, backrest cover, and 4 adjustable rubber feet.
5. **What is the maximum weight capacity?**
The allowable load is 150 kg.

Short buying guide:

When choosing a gynecological chair for the clinic, first evaluate the adjustments you truly need during the examination: if patient positioning is central, a seat with **gas springs** and **Trendelenburg/anti-Trendelenburg** capability like on the H930_79 helps you manage different postures with practicality. Then consider the physician's ergonomics: the **electrically adjustable height** allows the station to be adapted to the type of procedure and reduces repetitive strain. Check the completeness of the equipment (leg rests, footrest, stainless steel basin) because an already accessorized chair simplifies the organization of the examination room. Finally, choose the configuration best suited to the space and movement: **feet** prioritize stability and leveling, while any configuration with **swivel wheels** changes the height range and can be useful when the chair needs to be moved.

Adjustable seat gynecological chair, electric height gynecological chair, gynecological examination chair, Trendelenburg gynecological chair, anti-Trendelenburg gynecological chair, faux leather gynecological chair, stainless steel basin gynecological chair, H930_79.
