

Gynecological examination chair h528_22

Motorized gynecological chair in steel and imitation leather. Adjustable height 65-116 cm, capacity 200 kg. Ideal for examinations and minor surgeries.

Professional solution designed for intensive use in hospitals, specialized clinics, and gynecological medical offices. This chair combines a robust lacquered metal structure with an advanced movement system, ensuring stability and precision during diagnostic visits and outpatient procedures. The seat and backrest feature ergonomic high-density foam padding, with increased thickness in the cervical area to optimize patient comfort.

The movement system is entrusted to three electric motors managed via foot controls, which allow for smooth adjustment of height, backrest inclination, and pelvic section. The versatility of the device is confirmed by the possibility of reaching the **30° Trendelenburg position**, making the chair also suitable for minor surgical interventions.

Technical features

- **Height adjustment:** from 65 to 116 cm via electric foot pedal system
