

## Gynecology couch h528\_21

Professional gynecological couch with electric height and pelvic adjustment, differentiated padding and Trendelenburg position up to 30°.

The **h528\_21 gynecological examination couch** is a professional solution designed for medical practices and hospital departments requiring maximum versatility and operational comfort. The structure allows for extremely precise adjustment of the patient's position: the **pelvic section and height are electronically regulated** via foot controls, allowing the operator to keep their hands free. The backrest is instead managed manually through a smooth gas spring. Particular attention has been paid to the ergonomics of the seat, equipped with variable thickness padding that integrates a head support, eliminating the need for additional pillows.

## Technical features

- **Height adjustment:** from 65 to 116 cm by electric foot actuator.
- **Pelvic section:** electronically tiltable up to +30°.
- **Backrest:** manually tiltable with gas spring up to +54°.
- **Trendelenburg position:** reachable at 30°.
- **Dimensions:** width 58 cm, total length 115 cm (backrest 80 cm, seat 35 cm).
- **Structure:** RAL 7035 lacquered steel frame with scratch-resistant base and leveling feet.
- **Padding:** high-density foam with variable thickness (85-135 mm) and synthetic leather upholstery.
- **Maximum weight capacity:** 200 kg.
- **Included equipment:** 2 lateral surgical rails, 2 colposcope supports, stainless steel fluid collection tray (30x20x6.5 cm), integrated Schuko socket and rear roll holder.

### Available options:

- Pair of professional leg holders.
- Pair of padded armrests.
