

Gynecology examination couch h728_06

Gynecology couch with painted steel structure, adjustable backrest and leg rest, folding armrests, liquid collection tray and gynecological hole. Fixed height 80 cm, load capacity 180 kg.

Specialized couch for gynecology departments and practices, designed to support clinical examinations and obstetric procedures. The fixed-height structure ensures operational stability, with a white painted steel frame and adjustable feet to compensate for floor irregularities. The padded top, made of high-density foam (30 kg/m³) and covered in class 1IM fire-retardant vinyl, ensures patient comfort and compliance with fire safety regulations.

Adjustability and ergonomics: the backrest and leg rest are manually operated via a lever to adapt to different clinical positions. The 90° folding armrests facilitate lateral access, while the rotating and adjustable leg supports allow for physiological positioning during gynecological examinations.

Integrated equipment: a removable stainless steel tray for biological liquid collection, an ergonomic cushion to support the backrest, and a gynecological hole on the seat complete the clinical configuration.

Technical features

- Dimensions: L.175 x D.56 x h.80 cm
- Height: fixed 80 cm
- Maximum load capacity: 180 kg
- Frame: steel with epoxy coating and white painting
- Upholstery: 100% class 1IM fire-retardant vinyl
- Padding: 5 cm foam, density 30 kg/m³
- Backrest and leg rest: manual adjustment via lever
- Armrests: 90° folding
- Leg supports: rotating and adjustable
- Liquid collection tray: stainless steel, removable
- Accessories: ergonomic backrest cushion, gynecological hole on the seat
- Feet: adjustable
