

Vacuum pack machine with heat seal bar in plastic h0940

Machine Vacuum plastic bar. Automatic model and digital elevation equipped with sensor control

Machine to prolong the shelf-life of food, maintaining intact the organoleptic characteristics. Through the use of appropriate bags or containers creates a vacuum level such as to prevent bacterial growth at low temperature.

Specifications:

- Plastic housing
- solenoid valve for quick opening bar
- Dry Pump
- automatic model and digital
- provided with sensor altimetric adjustment
- Power: 0.49 kw
- Power 230V/1N750-60 Hz
- Sealing bar: 320 mm
- Vacuum pump: 0.9 m3 / h
- Maximum vacuum obtainable: 80%
- Height: 14 cm
- Width: 39 cm
- Depth: 31 cm

* Use plastic bags or rolls embossed
