

Rack bike galvanized and painted h10919

Carriers for 1-2 places in galvanized and painted steel version available to bolt or inghisare

Bicycle rack for 1-2 places achieved by cold bending of tubular steel.

The carrier is provided by inghisare with decorative plates to cover the hole or with base plate to bolt. Through the 'grouting the metal structure is welded to the ground with concrete or cement mortar. Alternatively, the metal structure can instead be anchored to the floor with expansion bolts.

All parts are hot-dip galvanized according to UNI and thermosetting polyester powder coated according to different RAL colors.

Technical detail:

- Rack in galvanized and painted steel
- Height: 900 mm
- Length: 1200 mm

Type of mounting available:

- To bolt
- From inghisare
