

Shelf in stainless steel 4 smooth shelves 140x40xh180 cm h11125

Modular shelf in AISI 304 stainless steel frame with a hook. Italian product.

Modular shelf in AISI 304 stainless steel, a special type of stainless steel consists of a specific mixture of chromium, carbon and nickel. This material is characterized by:

- excellent resistance to corrosion
- ease of processing
- good hygienic coefficient
- lifespan

The basic element of the shelves is to hook with the bearing structure of the uprights "U" 40x25x40 20/10 thickness. The installation is very simple thanks to the mounting hook on to punch holes. The shelves are smooth in thickness 8.10.

The shelving is complete crosswise reinforcement and plastic feet, useful to prevent damage of the bearing surfaces.

The edges are cut-resistant to ensure greater security and the finish is glossy.

Specifications:

- modular shelf
- AISI 304 stainless steel
- basic element to hook
- 4 smooth shelves thickness 8.10
- thick uprights 20/10
- complete transverse reinforcement
- plastic feet
- anti-cut edges
- glossy finish
- height 180 cm
- width 140 cm
- depth 40 cm
- Italian product
