

Shelf in stainless steel 4 smooth shelves 160x40xh180 cm h11126

Modular shelf in AISI 304 stainless steel frame with a hook. Italian product.

Modular shelf made of stainless steel AISI 304, a type of steel made up of a mix of carbon, nickel and chromium. This specific combination is characterized by:

- excellent resistance to corrosion
- ease of processing
- good hygienic coefficient
- lifespan

The structure of the shelves is to hook with a supporting structure of uprights "U" of the dimensions 40x25x40. The thickness of the uprights is 20/10. The shelf is mounted with ease thanks to a hook on the slots to the punch.

The shelves are smooth and filled and have a thickness of 8/10.

The shelving is complete crosswise reinforcement and plastic feet, useful to prevent damage of the bearing surfaces.

The edges are cut-resistant to ensure greater security and the finish is glossy.

Specifications:

- modular shelf
- AISI 304 stainless steel
- basic element to hook
- 4 smooth shelves thickness 8.10
- thick uprights 20/10
- complete transverse reinforcement
- plastic feet
- anti-cut edges
- glossy finish
- height 180 cm
- width 160 cm
- depth 40 cm
- Italian product
