

Wall lamp in wrought iron h16801

Wall lamp in wrought iron. Aluminum reflector and clear polycarbonate. Made in Italy

Wall lamp with wrought iron body treated in the galvanizing bath .

Galvanizing is the process by which it is applied a zinc coating on a metal artifact generally of steel to protect it from galvanic corrosion :it in fact limits the formation of micro - electrolytic cells to anodic action in the grain boundaries .Hot dip galvanizing protects steel structures for a time that often exceeds even the life cycle useful structures ; cooperates positively to reduce the environmental load over time of a building and is environmentally sustainable ; preserving corrosion maintains the design features ,collaborating to the overall security of a work; has a low initial cost and comparable to other anticorrosive systems ; requiring no maintenance for decades , greatly reduces the cost in time of a work .

The diffuser is made of aluminum and transparent polycarbonate.

Specifications:

- Voltage: 230V 50Hz
- Attack type : E27 26 - 27mm
- Dimensions : 29cm x 49cm x 25 cm
- Degree of protection : IP44
- Class: 1

Product made in Italy

INFORMATION

- **Height** 29 cm
- **Width** 49 cm
- **Depth** 25 cm
- **Material** wrought iron
- **Typology** wall
