

Wall lamp with aluminum reflector h16825

Wall lamp in wrought iron treated in the galvanizing bath. Aluminum reflector with double glazing black / white. Made in Italy Wall lamp with wrought iron body treated in the galvanizing bath.

Galvanizing is the process by which it is applied a zinc coating on a metal artifact generally of steel to protect it from galvanic corrosion: it in fact limits the formation of micro-electrolytic cells to anodic action in the grain boundaries. Hot dip galvanizing protects steel structures for a time that often exceeds even the life cycle useful structures; cooperates positively to reduce the environmental load over time of a building and is environmentally sustainable; preserving corrosion maintains the design features, collaborating to the overall security of a work; has a low initial cost and comparable other anticorrosive systems; requiring no maintenance for decades, greatly reduces the cost in time of a work.

The diffuser is made ??of aluminum, with double glazing black / white.

Specifications:

● Voltage: 230V 50Hz • Attack type: E27 26-27mm

• Dimensions: 48cm x 47cm x 25 cm

• Degree of protection: IP23

Class: 1

Product made ??in Italy

INFORMATION

- Height 48 cm
- Width 47 cm
- Depth 25 cm
- Material wrought iron
- Typology wall
