

## Lamppost Outdoor stainless steel and aluminum h16882

Lamppost Outdoor stainless steel and aluminum with opal polycarbonate diffuser

White lamp post made of stainless steel and aluminum, materials that make it highly resistant to weathering. The diffuser is in opal polycarbonate, a material highly resistant at weather and at the impact.

The type of connection for the bulb is E27, screw diameter of 27 mm.

The lamp has a degree of protection IP44. IP is a code that summarizes the level of protection of electrical equipment against accidental or intentional contact with the human body or with an object, and protection against water and weather, so important especially when you have to build a plant outdoors. At the end of the fixed IP followed by two digits, the first digit indicates the protection against access of solid bodies, the value of 4 indicates that the equipment is protected against solid bodies larger than 1 mm. The second digit indicates the protection against access of liquids. The value 4 indicates that the device is protected from splashes.

The lamp is Class 1 insulation, the insulation class is a value that indicates the degree of protection from the risk of electric shock due to a fault. Appliances with protection class 1 are those in which in addition to basic insulation is a further protection from the connection, with the classic yellow-green cable with the grounding system of the electrical installation of the building.

Features:

- height 240 cm
- Class 1
- type of connection for the bulb E27
- degree of protection IP44
- voltage 230v 50hz
