

Waterproof anti-decubitus pillow h18202

Anti-decubitus cushion easy to carry because it can be rolled up for users who have moderate positioning needs and security risk decubitus

Recommended for users who have moderate positioning needs and protection from the risk of pressure sores. E 'ideal for the elderly and for anyone to remain in a sitting position for a long time. E 'extremely practical to carry because it can be rolled up, can also be useful for those who need a second cushion for limited uses in time such as, for example, in automobile. The cushion is also light: weighs only 300 g. The pillow is made with open-cell foam that allows the user's immersion by providing support and spreading the load pressure. The coating material is waterproof with puncture resistant. Technical data:

- measures 41x41 cm
- moderate skin protection
- moderate positioning
- standard valve
- Single room air
- height 7.6 cm
- weight 300 gr
