

h2080 umbrella bag dispenser

Umbrella bag dispenser in metallic gray painted metal. Mechanical operation without electrical power. Capacity: up to 500 bags.

The **h2080 umbrella bag dispenser** is a professional device designed to maintain hygiene and safety in entrances during bad weather days. Characterized by a robust structure in metallic gray **painted metal**, this dispenser offers **purely mechanical operation**, eliminating the need for electrical connections or batteries. The system resolves the operational problem of dripping wet umbrellas on smooth floors, drastically reducing the risk of slipping. Thanks to the compact design and the presence of practical **lateral handles**, the unit can be easily moved and strategically positioned depending on user flow needs.
