

Wall to floor grab bar in stainless steel h4025

Grab bar in stainless steel AISI 304 with fixing lugs for mounting on walls and floors. Available with left or right orientation

Looking for a grab bar for a public toilet for the disabled and elderly? The support handle h4025 meets the ADA North-American standards on equipment for bathrooms for a barrier-free community. The bending process ensures a uniform diameter in all curves.

The weight carried by the handle will depend on the type of wall and fastening element used.

Components and materials:

- handle in stainless steel AISI 304 satin finish, thickness of 1.5 mm, an outer diameter of 32 mm

- fixing bar, 1 unit in AISI 304 stainless steel, 3 mm thick, with 2 holes 6.5 mm diameter for mounting on walls and floors
- front, 3 units, stainless steel AISI 304, satin finished, wall thickness of 0.8 mm and a diameter of 91.5 mm, which hides the fixing bar
