

Chair scab zebra polymer 4 legs h74278

Chair with tubular steel frame painted and with technopolymer shell completely recyclable.

Chair with tubular steel frame with a diameter of 16 mm, galvanized and painted (color linen). The coating in polyester powder protects it from rust and attacks by external agents, making it a complement of furniture perfect for both indoor and outdoor environments.

The shell is made of polymer and is available in two different colors.

Chair simple design that gives attention to the environment as it is completely recyclable, all of its components are readily distinguishable because of the mark of identification that provides guidelines for recycling.
