

Chair scab natural zebra antishock h7491

Chair with beechwood frame and polycarbonate shell of Italian production available in transparent and tinted

Designer Luisa Battle for Scab Design

Chair with beechwood frame and polycarbonate shell of Italian production.

The chair combines harmony and strong temperamento. It is made of natural beech, while the plates are transparent polycarbonate shock, smoke. And it is characterized by a sophisticated design that points on the combination between the beech and polycarbonate, while taking account of the convenience.

It is a product suitable for many environments, ideal for both home use and in public places.

The product structure has 4 legs in natural beech; the body, the shape comfortable and cozy chair design is made with 100% recyclable materials made of Makrolon® from Bayer MaterialScience.

Polycarbonate is a material highly resistant to scratches and bumps.

* The chair is sold with a minimum package of 2 pieces
