

Pouf in polyethylene h8502

An ottoman which style and draws peace and relaxation with an oriental and contemporary style at the same time

Design 100% Made in Italy 21st street design

Design Moredesign to 21st street design

The Pouf Beato refer to distant worlds, the oriental atmosphere represented by the Buddha, re-interpreted in a modern and attractive way. Relax not only in design but also in the shapes, infused with references to peace and well-being.

The Pouf h8502 is also made of polyethylene, and therefore, in addition to being particularly resistant, can be used both inside and outside of the dwelling. The pouf is surmountable and the hole in the ear allows you to string together more poufs.
