

Stender hangers in steel h9704

Design stender garment suitable for homes, offices and shops with frame in white lacquered steel and stainless steel bars.
Dimensions: 53 x 75/120/150 x 163 cm

Stender garment design made in Italy characterized by particular functional flexibility and size that makes it suitable for commercial spaces, offices and private. The steel pipe of square section, bent into a round arch, seems to contradict the linearity of the lower part of the work. At the same time the abrupt interruption of discontinuity creates a visual journey into the unexpected: the organization structure of the peculiar accents or softens the interruption depending on your point of view.

The stender h9704 is easy to assemble with four allen screws, easy to handle because it is light and easy to move thanks to wheels.

Features:
