

Umbrella stand design with marble base h9748

Umbrella stand by the current design and contemporary with marble base and stainless steel

Unique and contemporary design for an umbrella stand that seems to float. The dynamic lines of the structure are solidly anchored to the marble base Biacone Asiago in which excavated the water collection tank to direct the water coming from umbrellas.

The umbrella combines lightness and strength in a single piece of design and production Made in Italy.

The product is made of stainless steel and marble. Stainless steel is a very durable material that is to weather shocks. E 'very solid, mixed with the marble of the base, creates a unique combination.

The water collection tray allows you to collect and channel the water coming from umbrellas, avoiding the water can end up on the floor and cause dirt and puddles.
