

Ham curing trolley h509_62

Stainless steel trolley for curing cured meats, compact dimensions (120x70x180 cm), capacity 500 kg, removable bottom shelf for easy cleaning.

The trolley is designed specifically for the needs of **cured meat factories, butcher shops, and food industries** that require a practical and durable solution for the curing and handling of cured meats. Its **compact dimensions allow passage even in narrow spaces**, facilitating internal logistics without compromising on robustness and operational stability.

The **stainless steel** construction guarantees hygiene, resistance to corrosion, and compliance with curing room standards. The **removable bottom shelf** represents a key element to simplify cleaning and sanitization operations, a critical factor in regulated food environments.

Technical characteristics

- **Dimensions:** L 120 × W 70 × H 180 cm
- **Material:** stainless steel
- **Capacity:** 500 kg
- **Bottom shelf:** removable
- **Weight:** 38 kg
