

Heating belt for 50 lt drums h995_01

Silicone heating belt for 50 lt drums. Temperature: 0 – 130 °C. Dimensions: L 950 x H 115 mm.

The **H995_01 drum heater belt** is a **flexible silicone rubber heating band**, specifically designed for **50-liter** metal drums. Ideal for **heating, thinning, or maintaining the temperature** of industrial contents, this belt ensures safe and efficient application in **industrial, chemical, food, or cosmetic** sectors.

Thanks to its **perfect adherence to the drum body** and its **compact structure**, it is **easy to apply, remove, and store**. The insulating material made of **fiberglass embedded in silicone** ensures **resistance to high temperatures**, long durability, and operational safety.

It is equipped with an **adjustable thermostat from 0 °C to 130 °C**, which allows for precise temperature control, adapting to various heating needs. Installation is simple and secure thanks to the **tension springs and closing chains**, which guarantee an excellent grip without slipping.

It operates with a **230 V single-phase power supply** and a power of **500 W**. The **1.5 m power cable** is supplied **without a plug**, to adapt to different system configurations.

Optimize your production processes with the **H995_01 drum heater belt**. Contact us for more information or for bulk supplies.

Technical features:

- **Type:** heating band for metal drums
- **Drum capacity:** 50 liters
- **External material:** silicone rubber with fiberglass insulation
- **Power supply:** 230 V / single-phase
- **Heating element:** resistive wire
- **Power:** 500 W
- **Adjustable temperature:** from 0 °C to 130 °C
- **Thermostat:** integrated, manually adjustable
- **Length:** 950 mm
- **Band height:** 115 mm

- **Minimum drum diameter:** Ø 325 mm
- **Equipment:** tension springs, closing chains
- **Power cable:** 1.5 m (without plug)
- **Usage:** exclusively for metal drums

User benefits:

- **Ideal:** for thinning viscous materials safely.
- **Easy:** to apply and remove.
- **Temperature:** adjustable for every process requirement.
- **Compatible:** with all 50 lt metal drums.
- **Design:** compact and space-saving.

FAQ:

1. **Is the band suitable for plastic drums?**
No, it is designed exclusively for metal drums.
2. **Do I need an adapter for the power cable?**
The 1.5 m cable is supplied without a plug, to be connected as needed.
3. **Can I adjust the temperature manually?**
Yes, the integrated thermostat allows for adjustment from 0 °C to 130 °C.
4. **What is the power consumption?**
The band has a power of 500 W at 230 V single-phase.
5. **Is it easy to install?**
Yes, thanks to springs and chains, it is easily and safely applied.

Mini buying guide:

If you work with **viscous or solidifiable materials** such as oils, waxes, glues, or paints, a drum heater belt is a fundamental tool.

The H995_01 model is ideal for 50 lt metal drums, with **effective insulation, precise thermoregulation, and maximum adherence**.

Choose **certified, resistant, and adjustable** products to ensure safety and operational continuity in your industrial processes.

50-liter drum heater belt, silicone heating band for drums, drum heater with adjustable thermostat, heating band for metal drum, industrial drum belt 230V 500W.
