

Heavy-duty service transport trolley h09_269

Professional AISI 304 stainless steel trolley with 2 reinforced shelves for heavy loads up to 200kg. Dimensions 92x67x98 cm, 125 mm wheels.

The **h09_269** service trolley is designed for intensive handling in professional environments that require high hygienic standards and structural robustness. Made entirely of **AISI 304 stainless steel**, the trolley features a 25x25 mm tubular frame that guarantees stability even when fully loaded. The construction peculiarity lies in the two shelves, equipped with a lower **reinforcement omega**: this technical solution prevents bending of the sheet metal and allows for the safe transport of heavy equipment or concentrated loads.

Technical features

- **Material:** AISI 304 stainless steel with professional finish
- **Structure:** High-resistance 25x25 mm tubular frame
- **Shelves:** 2 stainless steel levels with structural reinforcement omega
- **Shelf dimensions:** 80x60 cm
- **Total dimensions:** 92x67x h.98 cm
- **Capacity:** Maximum supported load of approximately 200 kg
- **Mobility:** 4 multi-directional wheels with a 125 mm diameter
- **Safety:** Non-marking rubber corner bumpers
