

Heavy-duty service trolley h22_245

Professional AISI 304 stainless steel service trolley with 2 soundproofed tray shelves, dimensions 109x69 cm and reinforced structure on wheels.

The **h22_245** service trolley is a high-performance logistics solution designed for mass catering, the healthcare sector, and professional laboratories. The structure is entirely made of **AISI 304 stainless steel** with a brushed finish, a material choice that guarantees maximum corrosion resistance and ease of sanitization essential in sterile or food environments. The load-bearing frame, consisting of a round tube with a diameter of 2.5 cm, ensures structural solidity even under heavy loads.

Operational ergonomics is guaranteed by the two tray-shaped stamped shelves with rounded edges, which prevent the leakage of liquids or objects during handling. A distinctive element is the **soundproofing of the shelves**, designed to reduce noise pollution generated by vibrations during transport, making it ideal for hospital wards and dining rooms.

Technical features

- **Material:** AISI 304 stainless steel with brushed finish
- **Frame:** 2.5 cm diameter round tube with closed structure
- **Shelves:** 2 stamped tray shelves, soundproofed and welded to the frame
- **Surfaces:** Rounded edges and corners for maximum safety
- **Mobility system:** 4 swivel wheels Ø 12.5 cm, 2 of which are equipped with brakes
- **Protection:** Perimeter bumpers in non-marking grey rubber
- **Total dimensions:** W 109 x D 69 x H 95 cm
- **Useful shelf dimensions:** 100 x 60 cm
- **Configuration:** Reinforced structure for intensive use
