

Height-adjustable school chair h908_36

Adjustable school chair in steel and beech with a single-column C-structure, heights 35-51 cm, ideal for primary and secondary schools.

This **school chair** is designed to meet ergonomic and resistance needs within **primary and secondary schools**. The **"C"-shaped single-column structure** configuration not only provides a modern and functional design, but also facilitates cleaning and movement within the classroom. The frame, made of robust **steel tubing**, supports a seat and backrest in **beech plywood**, a material chosen for its durability and for the natural comfort offered to students during lesson hours.

Technical features

- **Structure:** single-column "C" shape in high-resistance steel tubing
