

Height-adjustable workbench h900_08

Industrial workbench in 40mm solid beech with drawer and shelf. Load capacity 1250kg, ideal for workshops and mechanical laboratories.

This **professional workbench** is designed to meet the stability and resistance requirements typical of industrial and artisanal environments. The supporting structure in **square steel tube** supports a **40 mm solid beech top**, an ideal surface for heavy mechanical processing thanks to its shock absorption properties and mechanical durability. The integration of a lower shelf and a drawer optimizes operational space organization.

Technical features

- **Worktop:** Solid beech with 40 mm thickness
- **Frame:** Supporting structure in electro-welded square steel tube
- **Load capacity:** Maximum static load capacity 1250 kg
- **Storage:** 1 drawer with pull-out guides on roller bearings for smooth sliding
- **Additional surface:** Integrated lower storage shelf
- **Finish:** Powder coating resistant to scratches and common chemical agents
- **Dimensions:** L. 200 x D. 70 x h. 84-104 cm
- **Configuration:** Supplied already assembled for immediate use
