

Home care bed h732_04

Home care bed with electrically adjustable height. Dimensions: W.211 x D.105 x h.35/75 cm.

Home care bed ideal for home use or in clinics and nursing homes. Consisting of a **solid wood structure** and **iron slatted base**. The base is formed by 3 joints and 4 sections that allow the adjustment of the head section and the leg section. The bed is equipped with **6 sliding side rails (three per side)**, controllable via a safety button. The **height is adjustable via an electric actuator** with a relative low-voltage control panel equipped with a control unit. The base is complete with **4 wheels with brakes** that ensure practical and easy movement of the bed.

Technical features:

- Dimensions: W.211 x D.105 x h.35/75 cm
- Load capacity: 140 kg + 50 kg safety margin
- Structure material: solid wood connected with melamine-faced panel
- 3-joint and 4-section base with iron slats
- 6 sliding side rails controlled by release and safety button
- Electronically adjustable height via control panel
- Base with 4 wheels with brakes
- Structure color: bleached oak
