

Horizontal cylindrical tank 3000 lt h668_18

Horizontal water collection tank 3000 lt. Dimensions: L. 1970 x D. 1440 x h. 1530 mm. For underground installation. Color: black.

Horizontal tank designed for use in industrial environments, ideal for the collection of drinking water and rainwater, first flush rainwater. **Monoblock structure** made of **100% recyclable LLDPE linear polyethylene**, designed for **underground** applications. With **male threaded closure cap**, equipped with **vents**. Its horizontal structure facilitates installation and maintenance, offering greater stability and a **storage capacity** of approximately **3000 lt** of water, ideal for various industrial needs.

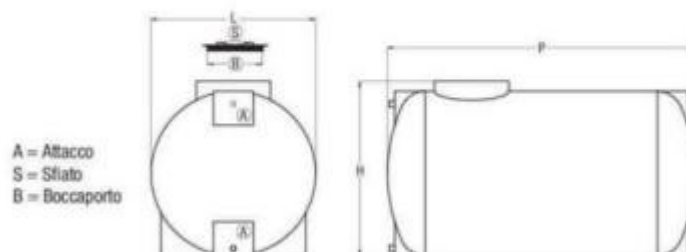

Technical features:

- Shape: cylindrical
- Type: horizontal
- For drinking water and rainwater
- Made of 100% recyclable LLDPE, with additives to resist UV rays
- Color: black
- Dimensions: L. 1970 x D. 1440 x h. 1530 mm
- Capacity: 3000 lt
- 400 mm closure cap, male threaded, equipped with vents
- Inlet stubs: 2"
- Outlet stubs: 2"
- For underground installation
