

Horizontal maze for playground h575_146

Horizontal maze in Nordic pine wood and colored HDPE for public parks, with educational teaching panels. Dimensions 458x235x103 cm, age 2-8 years.

The horizontal maze is a play-educational structure designed to stimulate **spatial orientation** and **cognitive learning** in children aged 2 to 8. Inserted in contexts such as public parks and play areas, it offers an immersive experience where small users explore **colored corridors** looking for the exit, developing problem-solving skills and awareness of the surrounding space.

The structure integrates three **interactive educational panels**: the **Flower** panel for learning colors in two languages, the **Luck** panel for the introduction to numbers, and the **Tris** panel for the development of logical-intuitive skills. This combination transforms the maze into a multidimensional educational tool that combines play and learning.

Technical features

- Supporting structure in **Nordic pine wood posts** 90 x 90 mm
- **Rounded corners** with 10 mm radius for safety
- Shaped panels made of **colored HDPE** (15 mm thickness)
- Overall dimensions: **458 x 235 x h. 103 cm**
- Required safety area: **758 x 535 cm**
- Maximum fall height: **60 cm**
- Necessary safety surfacing: **40.6 sqm**
- Age range: **2 - 8 years**
- Maximum number of simultaneous users: **3 or more**
