

Horizontal parallelepiped tank in PE h668_20

Horizontal parallelepiped tank in 100% recyclable LLDPE. Dimensions: W. 800 x D. 740 x H. 540 mm. Capacity: 300 lt.

Self-supporting monobloc tank made of **non-toxic linear polyethylene (LLDPE)**, **100% recyclable** and UV-stabilised. Ideal for **storing drinking water, rainwater and other food-grade liquids**. **Lightweight, washable structure** and easy to handle, **resistant** to impacts and chemical agents. Designed for **outdoor installations**, on a flat surface suitable for supporting the weight of the tank. Equipped with a **lid** with an **external diameter of 225 mm**. The tank has a **capacity** of approximately **300 lt.**

Technical features:

- Dimensions: W. 800 x D. 740 x H. 540 mm
- Capacity: 300 lt
- Measurements with overall dimensions tolerance $\pm 3\%$ and capacity $\pm 10\%$
- Made of 100% recyclable and non-toxic LLDPE, UV-stabilised
- Monobloc structure
- Shape: parallelepiped
- Type: horizontal
- For drinking water/rainwater and other food-grade liquids
- External lid $\varnothing$: 225 mm
- Inlet connections: 1/2"
- Outlet connections: 1"
- Temperature range -20°C $+40^{\circ}\text{C}$
- Liquid storage at atmospheric pressure
- Resistant to impacts and chemical agents
- Washable
- Use exclusively outdoors and avoid installation near heat sources
- Installation on a flat surface suitable for supporting the weight of the tank
- Placement entirely on the base and level
