

Hospital bed capacity 135 kg h582_229

Electric steel hospital bed with Ti-MOTION motorization, Trendelenburg functions and variable height. Ideal for nursing homes and health clinics.

The **hospital bed H582_229** is an advanced medical device designed to optimize care and comfort in clinical, hospital and residential settings such as nursing homes and retirement homes. Thanks to the **Ti-MOTION electric motorization**, the system allows for precise and fluid management of postural adjustments, reducing the physical effort of healthcare personnel and improving patient autonomy. The structure is designed to withstand intensive use cycles, guaranteeing stability and maximum operational safety.

The construction in **powder-coated tubular steel** integrates with a bed base made of **welded metal slats**, offering rigid and durable support. The aesthetics are enhanced by a wooden headboard and footboard, combined with aluminum side rails with a wood-effect coating, which give the device a welcoming appearance without compromising technical functionality.

Technical features

- **Maximum patient capacity:** 135 kg
- **Safe Working Load (SWL):** 170 kg
- **Structure:** Painted tubular steel
- **Bed base:** Welded metal slats
- **Total dimensions:** 216 x 102 x H 127 cm
- **Bed base dimensions:** 187 x 80 cm
- **Internal headboard/footboard space:** 205 cm
- **Frame height from ground:** 25 cm (minimum)
- **Adjustable bed base height:** from 40 to 81 cm
- **Maximum headrest angle:** 70°
- **Maximum legrest angle:** 30°
- **Trendelenburg / Reverse-Trendelenburg tilt:** 12° via independent actuators
- **Side rails:** Wood-effect coated aluminum
- **Wheels:** 4 swiveling Ø 125 mm with total brake system
- **Motorization:** Ti-MOTION (Power supply 220V Vac 50-60 Hz / Output 24V Dc)
- **Insulation and protection class:** Class 2, IP54 grade
- **Noise level:** Less than 45 dB
- **Total weight:** 99 kg (including 12 kg electric kit)
- **Certification:** Class I Medical Device
