

Hospital bed for Alzheimer's patients h562_21

Electric variable height hospital bed for Alzheimer's patients. Capacity: 135 kg. Bed base-floor height: min. 280 max. 690 mm.

Long periods of hospitalization or confinement to bed require tools and equipment that meet any need of patients with motor disabilities. The **variable height electric wooden bed** is designed for **Alzheimer's patients**, as it is equipped with a **bed base with a minimum height from the ground** of only **28 cm** which ensures safety for the patient both when lying down and during immobilization phases. In addition to being adjustable in height, the bed base is equipped with **mattress retainers**. With **4 sections with electric adjustment of the backrest and leg part** and **manual adjustment of the foot area** via rack. The bed is also equipped with **sliding and height-adjustable aluminum side rails, covered with a wood-effect film**; a **handset** and **2 actuators** to activate the **Trendelenburg and Anti-Trendelenburg** positions. Included **anti-blackout backup battery** that allows the bed to be returned to the rest position in the event of a power failure. The bed is equipped with **4 swivel wheels with parking brakes** for movement in total safety.

Technical features:

- Electric model
- 3 joints
- 4 sections
- Height-adjustable bed base
- Bed base height from the ground: min. 280 max. 690 mm
- Electric adjustment of backrest and leg area
- Manual adjustment of foot area (via rack)
- Mattress retainers on the bed base
- Aluminum side rails with wood-effect film, height adjustable
- Handset
- Anti-blackout backup battery
- 4 swivel wheels with parking brake
- Trendelenburg and Anti-Trendelenburg functions
- 2 actuators
- Patient lifting pole
- Maximum dimensions: 2165 x 1020 mm
- Weight: 90 kg
- Maximum capacity: 135 kg
- Maximum workload: 180 kg
- Bed base dimensions: 1900 x 900 mm
- Headboard/footboard height (from bed base): 465 mm
- Internal distance between footboard and headboard: 2025 mm
- Internal distance between side rails: 955 mm
- Head section dimensions: 800 x 440 mm
- Fixed pelvis section dimensions: 900 x 205 mm
- Leg section dimensions: 800 x 300 mm
- Foot section dimensions: 800 x 460 mm
- Maximum inclination of the mobile back section: 70°

- Maximum inclination of the mobile leg section: 35°
- Maximum inclination of the mobile foot section: 24°
- Maximum height of the mobile leg section from the bed base: 205 mm
- Bed base weight: 38 kg
- Weight of 1 pair of wooden rails: 4.4 kg
- Weight of patient lifting pole: 3.2 kg
- Maximum bed inclination: $\pm 11^\circ$
