

Hospital bed for healthcare facilities h634_51

Motorized hospital bed with painted steel frame, 4-section bed base, adjustable height and articulations, motorized femoral and backrest sections, Trendelenburg positions, CPR maneuver. 202×88.8 cm.

Hospital bed designed for healthcare environments (hospitals, clinics, care facilities) requiring maximum postural versatility and ease of use for medical and nursing staff. The structure meets the need to ensure patient comfort during hospitalization and treatments, supporting specific clinical maneuvers and advanced therapeutic positioning.

Technical features

- **Dimensions:** width 202 cm, depth 88.8 cm, variable height 95 + 30/40 cm
- **Structure:** painted steel frame with thermosetting epoxy powder coating
- **Bed base:** 4 sections with triple articulation, removable and washable thermoformed ABS covers
- **Backrest section:** motorized, 0-70° range
- **Femoral section:** motorized, 0-25° range
- **Leg section:** gas spring-assisted, synchronous with femoral movement, approx. 0-35° range
- **Height:** variable via motorized columns
- **Special positions:** Trendelenburg and reverse Trendelenburg, quick backrest release for CPR maneuver
- **Motors:** low-voltage electric with anti-crush and anti-shear system
- **Emergency power supply:** rechargeable batteries, duration approx. 10 cycles
- **Ends:** in technopolymer with removable HPL panel
- **Siderail setup:** compass-style side rails (not included, see optional)
- **Protections:** 4 perimeter bumpers
- **Mobility system:** braking device on two axes with directional system, 150 mm diameter non-marking wheels, operated via bilateral anteroposterior pedals
- **Control:** 10-button handset with 3.5 m coiled cable, key for control inhibition
- **Equipment:** cable winder, equipotential node

Optional: pair of compass-style side rails. Note: the addition of side rails may cause dimensional variations.
