

Hospital bed with 1 joint and crank h937_23

Hospital bed h937_23 in steel with adjustable headrest, maximum capacity 135 kg. Dimensions: L. 2060 x D. 910 x h. bed base 470 mm.

The **adjustable 1-joint hospital bed with crank and 2-section bed base**, model **h937_23**, is a versatile and functional solution designed to ensure **maximum comfort and safety** for patients, as well as practicality for healthcare personnel. Ideal for hospitals, nursing homes, clinics and rehabilitation centers, this bed stands out for its robustness and reliability. The **steel structure** painted with epoxy powders offers excellent resistance to wear and corrosion, ensuring long-term durability even with intensive use.

The **h937_23** model is equipped with an **adjustable headrest section** via a screw pusher with a folding, retractable crank with an end-of-stroke clutch, allowing medical staff to easily adapt the patient's position according to rest or treatment needs. The **leg section**, however, remains **fixed**, ensuring stability and safety. The **bed base** is built with **rectangular steel mesh**, which not only guarantees robustness but also an even distribution of the patient's weight, ensuring optimal support and preventing deformation over time. The **external perimeter supporting structure** is built in **rectangular section steel profiles**. **Mobile sections frame** made of **rectangular section steel tube**, with **rounded corners**.

Another important aspect of the **h937_23 hospital bed** is its suitability for use with medical accessories. There are **2 supports for the lifting pole and the IV pole**, making it extremely practical for a wide range of treatments and assistance. The **bed ends**, consisting of a **removable headboard and footboard**, are made of painted steel tube with a round section Ø 30x1.5 mm, with plastic tips at the base and feature **removable melamine panels**, facilitating maintenance and cleaning, which are essential in hospital contexts.

In addition to ease of adjustment and maintenance, the **h937_23** model stands out for its **high safety standard**. It can support a **maximum weight of 135 kg**, with a **safe working load up to 170 kg**, making it suitable for a wide range of patients, including people with specific needs or who require special care. The smooth surfaces and **rounded corners** of the frame minimize the risk of injury, a detail particularly appreciated in environments where safety is fundamental. Thanks to its **ease of use** and **compact dimensions**, the **h937_23 hospital bed** is also perfect for limited spaces, while still ensuring maximum functionality and comfort for patients.

This bed is the ideal choice for those looking for **reliability, comfort and safety** in a single product, combining functional design with high-quality materials for long-term use in professional healthcare environments.

Don't miss the opportunity to improve the comfort and safety of your patients. Order the **hospital bed model h937_23** today or request a quote for larger quantities!

Technical features:
