

Hospital bed with 4 swivel wheels h634_91

4-section electric hospital bed, adjustable height, 4 wheels Ø125 mm. Dimensions: W 217.2 x D 95.8 x H 72.4 cm.

The **H634_91 electric hospital bed** is a professional solution designed to ensure **maximum safety, accessibility, and comfort** in inpatient, long-term care, and rehabilitation wards. Designed for patients with reduced mobility, the elderly, and post-operative subjects, this bed improves the quality of care thanks to fully motorized functions and an ergonomic structure.

The **4-section mattress platform**, made of steel and protected by **thermoformed technopolymer covers**, is easily sanitizable and designed to adapt to the patient's anatomy. The backrest and thigh sections are **motorized**, while the leg section is **gas spring servo-assisted**, synchronized with the movement of the thigh part. Height adjustment is carried out via an **electric pantograph** with an excursion of up to 420 mm, allowing easy access to the bed and preventing injuries in case of accidental falls.

Thanks to the **4 non-marking Ø125 mm swivel wheels** with **centralized brake and directional mode**, the H634_91 bed is easily maneuverable, even in the most complex hospital environments. The **lever-based elevation system** also allows for **Trendelenburg and reverse Trendelenburg** positions, essential for certain therapies and clinical maneuvers.

The **10-button perimeter handset**, with a 3.5 m coiled cable, is intuitive and also designed for **visually impaired patients**, thanks to the membrane with raised pictograms and an **IP66** protection rating against dust and liquids. The **ABS head and footboards** are removable with a safety lock to facilitate access for healthcare workers and emergency procedures. The base frame, also protected by a **thermoformed ABS cover**, offers a ground clearance of 150 mm for the easy entry of patient lifts.

This configuration makes the **H634_91 bed** ideal for healthcare facilities looking for a complete, hygienic, functional product that complies with the safety standards required in the medical sector.

Contact us now to receive a detailed quote or to request assistance in configuring the **H634_91 bed** based on the needs of your hospital ward.

Technical features:

- **Structure:** steel with anti-corrosion pretreatment and epoxy coating
- **Dimensions:** W 217.2 x D 95.8 x H 72.4 cm
- **Frame color:** white
- **Side rails and boards color:** grey
- **Mattress platform:** ergonomic 4-section with sanitizable thermoformed covers
- **Motorized movements:** electric backrest and thigh section, servo-assisted leg section

- **Facilitates:** the work of healthcare personnel with full electric movements.
- **Ensures:** high hygiene with removable and washable components.
- **Offers:** a comfortable experience thanks to the ergonomic 4-section mattress platform.

FAQ:

1. **Is the bed equipped with wheels?**

Yes, the bed is equipped with 4 wheels.

2. **Is it compatible with patient lifts?**

Yes, the 150 mm distance from the floor allows for the use of mobile lifts in total safety.

3. **Does the bed come with side rails?**

The bed is pre-set for side rails (available as an optional extra).

4. **Is it suitable for use in intensive care units?**

Yes, thanks to the complete electric adjustments, Trendelenburg position, and safety features, it is also ideal for critical patients.

5. **What certifications does the product have?**

The bed complies with current medical regulations regarding electrical and mechanical safety, IP protection of the handset, and sanitization of materials.

Mini buying guide:

If you are looking for a hospital bed for a hospital or healthcare facility, first consider the **height adjustment**, which is essential for preventing falls and facilitating the work of operators. Choose models with **electric movements**, ideal for quickly adapting to therapeutic needs. The **structure must be sanitizable**, with materials resistant to hospital detergents. Also, ensure the bed is compatible with **side rails, lifts, and other clinical accessories**. Finally, verify that it is **certified** and complies with **health and safety standards**: the H634_91 model fully meets all these requirements.
