

Hospital cylinder transport trolley h55_46

Hospital cylinder transport trolley Ø210 for 15/20L, 2 non-marking 150mm wheels, containment strap, rubber grips, 60kg capacity.

The hospital cylinder transport trolley is a dedicated aid for the safe and controlled movement of oxygen cylinders within **healthcare facilities** such as hospitals and private clinics. It also represents a practical solution for home environments where frequent movement of a cylinder is necessary. The design ensures stability during transport and ease of maneuver in tight spaces.

Technical features

- **Cylinder dimensions:** Ø210 mm, capacity 15/20 liters
- **Wheels:** 2 non-marking grey wheels, diameter Ø150 mm
- **Ring heights:** 160-280-630 mm
- **Loading plate:** 250×200 mm
- **Overall dimensions:** 320×380×1100 mm (h)
- **Self-weight:** 4 kg
- **Maximum capacity:** 60 kg
- **Handle:** ergonomic
- **Grips:** non-toxic grey rubber
- **Containment strap:** with buckle for cylinder fixing
- **Finish:** epoxy powder coating, oven-dried
- **Color:** white
- **Certification:** CE compliant
