

Hospital dressing trolley h964_07

Trolley with 2 steel shelves, tilting basin and waste bin. Dimensions: W 122 x D 55 x H 90 cm.

The **hospital dressing trolley h964_07** is designed to facilitate dressing and care operations in hospital wards, clinics and outpatient departments. Its solid structure in **powder-coated square-section steel** guarantees resistance, stability and durability over time. It is equipped with two spacious **upper shelves of 1100 x 500 mm** that allow you to organize instruments and materials in an orderly and accessible way. The recessed surface of the shelves ensures that the instruments remain well-positioned, avoiding accidental falls during movement.

To make operations even more efficient, the trolley is supplied with **two instrument rails**, ideal for hanging forceps, scissors and other essential tools. Furthermore, it is equipped with a practical **tilting stainless steel basin** with a diameter of 220 mm and a capacity of 2.5 liters, perfect for collecting liquids or medical waste. The **plastic waste bin with lid** ensures hygienic management of waste materials, avoiding cross-contamination.

The structure is designed with **upward-facing handles** that offer an ergonomic grip for easily moving the trolley. The **100 mm** wheels with plastic housing, two of which are equipped with brakes, allow for smooth mobility and secure locking during operations. The **integrated bumpers** protect both the trolley and the surrounding environment from impacts and accidental damage. The decorative elements in **RAL 5012 blue** color add an aesthetic and professional touch, also facilitating the identification of the trolley within the wards.

This trolley is the ideal solution to ensure efficiency, organization and hygiene in daily dressing procedures.

Improve efficiency and organization in your department with the dressing trolley h964_07. Request a personalized quote now and get the most out of your hospital equipment!

Technical features:

- **Structure:** Powder-coated square-section steel (25x25 mm)
- **Upper shelves:** 2 powder-coated white steel shelves (1100 x 500 mm)
- **Instrument rails:** 2 integrated rails for organizing instruments
- **Tilting basin:** In 0H18N9 stainless steel, diameter 220 mm, capacity 2.5 liters
- **Waste bin:** In plastic with lid for hygienic waste management
- **Wheels:** 4 wheels of 100 mm with plastic housing, 2 with brake
- **Bumpers:** Integrated to protect against impacts
- **Decorative elements:** RAL 5012 blue color
- **Total dimensions:** W 122 x D 55 x H 90 cm

User benefits:

- **Optimal organization:** Two spacious shelves and rails for efficient instrument management.
- **Guaranteed hygiene:** Tilting basin and bin with lid to dispose of waste safely.
- **Ease of movement:** Wheels with brake for smooth movement and stability during procedures.
- **Strength and durability:** Robust structure in powder-coated steel.
- **Impact protection:** Integrated bumpers to avoid damage to walls and equipment.

FAQ:

1. **Are the trolley shelves removable?**

No, the shelves are fixed and guarantee stability during use.

2. **Are the wheels lockable?**

Yes, two of the four wheels are equipped with brakes to ensure stability.

3. **Is the basin removable?**

Yes, the tilting basin can be unhooked for easier cleaning.

4. **What material is the bin made of?**

The bin is made of resistant plastic with a practical lid for hygienic waste management.

Mini buying guide:

If you are looking for a dressing trolley that guarantees efficiency and practicality, it is important to consider some key factors. First of all, make sure that the **structure is robust** and made of resistant materials such as powder-coated steel, capable of withstanding daily use and the typical stresses of hospital environments.

Check the **shelf layout**: two large upper shelves allow you to comfortably organize instruments and materials, keeping everything within reach. Furthermore, the **instrument rails** are ideal for hanging forceps, scissors and other tools, avoiding clutter and ensuring quick access. The presence of a **tilting stainless steel basin** facilitates the collection of liquids and waste during dressings, while the **bin with lid** ensures safe waste management.

Another important aspect is **mobility**: the 100 mm wheels, with two brakes, allow you to move the trolley easily and lock it securely when necessary. Don't forget to check for **integrated bumpers**, which protect walls and furniture from any impacts during movement.

Finally, choose a trolley with a configuration that can adapt to the needs of your ward, ensuring **hygiene, practicality and safety** in daily procedures. A well-designed trolley will improve work efficiency and make dressing operations faster and more organized.
