

Hospital electromedical trolley h583_27

Medical trolley with 3 shelves 40 x 36 cm, aluminum column and wheels Ø 80 mm. Height: 95 cm. Base width: 58 cm.

The **electromedical trolley H583_27** is a **compact, stable, and functional solution** for the transport and support of **medical and electromedical devices** in hospitals, clinics, and outpatient surgeries. Made with **resistant and lightweight materials**, it is ideal for daily use in professional environments where **maximum hygiene, maneuverability, and safety** are required.

The **structure** consists of an **extruded aluminum column**, robust and lightweight, supporting **3 shelves of 40 x 36 cm** equipped with **ABS corner caps**, designed to protect against impacts and accidental damage. The shelves offer sufficient space for diagnostic instruments, small devices, or medical accessories.

The **tubular base** is also equipped with **ABS bumper caps**, which protect surrounding surfaces and facilitate the positioning of the trolley in tight spaces.

The trolley is equipped with **4 wheels of Ø80 mm**, of which **2 with brakes**, ensuring **fluid movements and stable locking** during use. The wheels are designed for use on hospital surfaces, ensuring smoothness without leaving traces.

Choose the **H583_27 trolley** for the orderly and safe management of your electromedical equipment. Contact us for more information or to receive an offer dedicated to your healthcare facility.

Technical features:

- **Base:** tubular with ABS bumper caps
- **Column:** extruded aluminum
- **Shelves:** 3 shelves 40 x 36 cm with ABS corner caps
- **Wheels:** 4 wheels Ø80 mm, 2 with brakes
- **Height:** 95 cm
- **Base width:** 58 cm

User benefits:

- **Structure:** stable and lightweight thanks to the extruded aluminum.
- **Shelves:** protected by ABS corners to avoid impacts.
- **Wheels:** with brakes for safety during use.
- **Compact:** and maneuverable, suitable for tight spaces.
- **Design:** functional, ideal for supporting electromedical devices and instruments.

FAQ:

1. **Is the trolley supplied already assembled?**
It is supplied disassembled, with instructions for quick assembly.
2. **Are the wheels lockable?**
Yes, 2 of the 4 wheels are equipped with brakes.
3. **Is it suitable for transporting electronic devices?**
Yes, the shelves are stable and spacious for positioning lightweight equipment.

4. **Do the corner protectors protect in case of impact?**

Yes, the ABS corner caps act as bumpers against accidental impacts.

5. **Is the structure resistant to chemical agents?**

Yes, the materials used are suitable for the hospital environment and easily sanitized.

Mini buying guide:

For daily professional use in healthcare environments, it is fundamental to choose a trolley with **compact dimensions, braking wheels, resistant materials, and protected shelves**.

The H583_27 trolley meets all these needs thanks to its **aluminum column**, its **stable base with bumpers**, and the **presence of three shelves** well-distributed.

It is the ideal choice for diagnostic departments, laboratories, and clinics.

Hospital electromedical trolley, 3-shelf medical trolley, wheeled trolley with brakes for clinics, trolley for hospital medical instruments, aluminum trolley for electromedical devices.
